CHECKLIST / LAUNCH & GROW

The small-app launch checklist

24 checks to review before and after a limited first release. Adapt them to your app and platform.

The user experience

[ ] A new user can understand the main benefit in one sentence.

[ ] The main action works without you explaining it.

[ ] Loading, empty, success, and error states are clear.

[ ] Navigation and forms work on a narrow mobile screen.

[ ] Buttons and inputs have readable labels and keyboard focus.

[ ] Your first tester has completed the real workflow.

Reliability and data

[ ] Validate input in the place that enforces the rule.

[ ] Check permissions for each protected action.

[ ] Handle missing data and failed requests without silent failures.

[ ] Keep secrets out of client code and source control.

[ ] Back up important data and test your recovery approach.

[ ] Collect only the personal information you need.

Release decision

CHECKLIST / LAUNCH & GROW

Make the first release useful.

24 checks to review before and after a limited first release. Adapt them to your app and platform.

Your offer and distribution

[ ] The offer states who it helps and what they receive.

[ ] The displayed price and payment frequency are clear.

[ ] A real payment flow is tested in the provider test mode.

[ ] The delivery, refund, and support paths are written down.

[ ] Your installation or access instructions work for a new user.

[ ] Your outreach link and intended landing page work.

After the first release

[ ] A user knows how to report an issue.

[ ] You can observe failure reports without logging sensitive data.

[ ] You measure the main useful action, not just page visits.

[ ] You can distinguish test activity from real purchases.

[ ] You have a simple way to revert a broken release.

[ ] You have scheduled one feedback review, not a feature spree.
